## ***Bridging the Gap between Manufacturing and the IT World***

**Results Engineering is a leader in the industry in understanding manufacturing control operations while at the same time delivering real time data to the IT database. Results Engineering can facilitate the presentation of the manufacturing data or simply provide it to the enterprise system to be dispersed amongst the enabled team. Turn innovation into results through the flow of information.**

### **Manufacturing Operations Execution & Control**

- Plant Operational Metrics
  - ♦ Production & Energy Monitoring
  - ♦ Inventory, Material & Actual Cost Tracking
- Manufacturing Intelligence
  - ♦ Real time Data Acquisition & Distribution
  - ♦ Data Storage and Retrieval Systems
  - ♦ Web Based Reporting
  - ♦ ISO Tracking
- Resource Management
  - ♦ Equipment Monitoring
  - ♦ Labor Coordination

### **Information Systems Services**

- Strategy Consulting
  - ♦ Back-up Strategies
  - ♦ Failure & Risk Analysis
- Evaluation
  - ♦ Site Survey
- Planning & Design
  - ♦ Network Topology Recommendations
  - ♦ Hardware & Software Recommendations
- Integration & Implementation

### **Programming Capabilities**

- SQL Server
- ERP Connectivity
- VB, C++
- .net
- Process & Motion Control Programming

***Delivering Value Added Information Technology Solutions***
